

# AES Rental Program

Our rental program offers brand-new/never-used machines with full warranty at an affordable price. Ideal for the Food and Beverage markets, where sanitation needs, and fear of bacterial cross-contamination is a deterrent to consider pre-used equipment.

## About our Machines

Our Sapphire Horizontal Flow Wrappers are arguably the most sanitary and easy to clean horizontal flow wrappers in the market. Equipped with One Motion Mag-drives, they are highly efficient to run and easy to maintain.

## TRY BEFORE BUY

Not sure if the equipment fits your existing line? Need the equipment quicker than your capital purchasing approval cycle? Are you testing a new product?

Our rental program reduces the risk of having idle equipment when a new product fails to achieve market acceptance. It is also a great alternative to satisfy sudden increases in product demand or for special trial runs.

## RENT-TO-OWN

Control your cash flow by using your operational budget for rental payments until you have the financial position to convert your Rent to Buy.

Our Rent-to-Own program includes a discount equivalent to 50% of the rent fees that you have already paid. In other words, you "earn" equity on the machine on each rental payment until you are ready to buy.

## HOW DOES IT WORK?

Our rental program allows you to rent for a minimum period of six months with an option to buy the machine at any time during the rental period.

Whether you need a horizontal flow wrapper to meet spikes on demand or to test a new product until market acceptance is achieved, or even to start up a new line without investing much in capital equipment, just follow these 4 steps to start production

- 1 Contact our Sales group for the right machine to suit your needs
- 2 Sign the rental agreement and pay the first and last month to start the process.
- 3 Send your product and packaging material for a quick setup before shipping
- 4 Use the machine for as long as you need even after the initial rental period is over.
