PROFILES

Overview Standard Profiles
On the basis of its many years interaction with engineers and end users, Ammeraal Beltech has developed a comprehensive range of profiled belts, capable of meeting all the requirements of industry with respect to efficient product handling. Practically every Ammeraal Beltech belt can be coated with one of over 80 standard available profiles, while specific requirements can be met with custom engineered solutions.

If necessary, new profiles are developed in close cooperation with the customer. Many of today's confectionery products for instance are profiled with brand names using customised Ammeraal Beltech belts.

To give you an impression of the practically unlimited possibilities that exist for improving your product handling, our more successful profiled belts can be found on the following pages.
