

Core Restorer Model CR-03.000

EXPERIENCE

Goldenrod and Svecom (Italy) have decades of designing and manufacturing Core Shafts and Core Chucks worldwide.

ENGINEERING

All products are designed to meet the needs of our customers, and stay in service with minimal maintenance.

EXPANDING SOLUTIONS

We have one simple goal:
to exceed your expectations.

Goldenrod Corporation
25 Lancaster Drive
Beacon Falls, CT 06403

Crushed Cores can slow your production to a crawl, and operators today need to have **ready access** to a device that will open these cores enough to get a shaft through.

The **CR-03.000 Core Restorer** is a portable device that works with compressed air to scissor open a split tapered cone to reform 3" ID core ends.

Adapters are available for 6" ID to 10" ID cores. The unit weighs 27 lbs and connects to your shop air-line.

The CR-03.000 Core Restorer is IN STOCK!

Usage and Safety Instructions

MULTIPLE BLADDER

A bladder can be replaced in our Multibladder Shafts in less than 5 minutes. Watch the Multi-Bladder Maintenance Video on our website:

www.goldenrodcorp.com

PNEU-MECH CHUCKS

Run high roll weight and torques with our 1420-LF Pneu-Mech Chucks and Adapters.

LIFTING and HANDLING

See our Manual or Driven Carts for Shaft Removal or Roll Lifting.

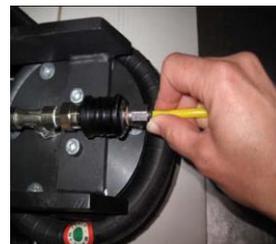

For more information on any of our products or services please visit us on the Web at:
www.goldenrodcorp.com

FOR **SAFE OPERATION**, the operator must always have one hand on the Top Handle and one hand on the Side Handle or the ON/OFF Sleeve. **KEEP HANDS AWAY** from the Bladder and the Scissoring Frame. **ONLY INFLATE INSIDE A CORE.**

Connect the shop air line to the Core Restorer with a 1/4" plastic air hose and insert it into the quick connect fitting.

Slide the Black or Blue Sleeve toward the front to turn ON the Air; slide the Sleeve back to turn OFF the Air. At the end of the fittings is a Pressure Release Valve (**SAFETY FEATURE**).

PROCEDURE: 1) Insert the Split Tapered Nose into the core. Keep one hand on the Top Handle; 2) Use the other hand to slide the Black Sleeve forward. The Bladder will inflate and scissor open the front tapered nose. 3) Turn OFF the air by sliding the sleeve back and remove the CR-3 unit from the core. **REPEAT AS NECESSARY.**

ADAPTERS for other core sizes are available (6" sets in stock); these are supplied in two halves and bolt to the Tapered Nose.
